

We have a proactive HSE management system.

The health and safety of our employees, contractors, community members, and the environment are the primary concern of our operations. The goals of our routine training programs are to prevent injury and form a behavioral approach that engages every staff member to be alert and safe, no matter how small the task.

NodalSeismic has an exemplary safety record.

System Highlights

- Behavioral-based HSE system
- Refinery access training
- Client specific training (as needed)

3rd Party Audits

ProForma Safety audits every 6 months.

NodalSeismic, LLC has a membership in:

- PICS
- ISNetworld

Regulatory Agencies

In every region in which we operate, our comprehensive HSE system is central to our everyday actions. It is based upon, and above and beyond, the recommendations of these agencies:

- OSHA - Occupational Safety and Health Administration
- IAGC - International Association of Geophysical Contractors
- OGP - Association of Oil and Gas Producers

Safety Benefits of our Cable-Free System

Our lightweight system weighs approximately 1/10 the weight of cable per station.

- Zero troubleshooting
- Lightweight
- Less equipment required
- Less repetitive motion involved
- Less men needed on each crew

= Less HSE exposure

For more information about our safety program, contact us at hse@nodalseismic.com.
